

What Is Flo-Form[®]?

Spry's Flo-Form[®] technology allows our neonatal positioners to be micro-contoured for each patient's unique medical needs. Flo-Form also helps to protect the skin, promote neutral body alignment, and encourage healthier development of fragile neonatal patients.

For Head Positioning

- Redistributes pressure to protect the skin
- Helps reduce lateral skull flattening
- Promotes neutral head / trunk alignment
- Facilitates tube / line management
- Recommended for single patient use

For Body Positioning

- Creates a soft outer boundary to support a flexed, midline position
- Helps maintain neutral body alignment and positive airway
- Encourages normal musculoskeletal and neuromotor development
- Recommended for single patient use
